

# Information Management Systems 304

Jeff Averett

Improving Processes. Instilling Expertise.

**DYNO**  
Dyno Nobel

**SANDVIK**

# Course Agenda

- **Overview of Information Technology tools related to blasting**
- **Getting it all together**
  - ✓ **How to collect & store beneficial information**
  - ✓ **What value does this information provide?**
  - ✓ **How do we make the information meaningful?**
- **Other tools**

# Electronic Shot Reporting

- **We have a legal requirement to document blasting activities**
  - ✓ **This requirement can be leveraged to provide useful information that can help define future blasting parameters**
  - ✓ **Electronic Reporting can also increase the productivity of your blasters**
    - Can reduce the amount of time needed to create a report
    - Reduces errors
    - Ensures consistency
- **Combining with other electronic data makes optimization easier**

**General**

Date and time: 10/26/2009 02:00 PM

Owned by: ANDERSON COLUMBIA COMPANY

Mine: JUNCTION CITY MINING

Shot number: 1026

Status: Active

Order / Project #: 63254 19

Purchase order number:

Blaster: Jeff Averett

License: ABC123

Laid out by: John Watson

Load start/end: 07:00 AM 12:00 PM

Comments:  Scheduled

**Conditions**

Temperature: 58 Fahrenheit

Barometer: 30.12 in/Hg

Weather: Clear

Wind: 6 MPH Southwest

Ceiling: Unlimited Foot

Bench: 2nd Bench Blast type: Production

Location: Southeast Initiation: DigiShot

Material: Granite Method: Electronic

Face type: Multiple Pattern: Square

Min. face height: 0 Max: 0

Grid map: Personnel: 4

Map date: 1/ 1/2000 Shovel number: 142

Desired powder factor: 2.00 Tons/lb Protection used:

Specific gravity: 2.70  Mats used

Tons/Yd3: 2.27  Video captured

((Burden x Spacing x Depth) / 27) x 2.27 = Tons

**Shot GPS Points**

GPS data display mode: Latitude & Longitude (D)

	Latitude	Longitude
▶	32.64010	84.51200
*	0.00000	0.00000

Drag a column header here to group by that column.

## Detail

- Calculate distance to closest corner, if available
- On save, calculate expected vibration, if available
- Allow nearest structure override
- Calculate seismograph reading expected vibration in memory, if available (may exhibit delay)
- Automatically add fixed seismographs on new shot
- Automatically add non-owned structures for portable seismographs on new shot

Expected vibration:

Confinement (H factor):

**Pre-Blast Checklist**

**Form Completed**

- 1. Performed a pre-use inspection of all equipment and vehicles?
- 2. Sign in and notify the mine management that we are on site and ready to load shot?
- 3. Reviewed drilling log?
- 4. Reviewed seismic report from previous blast in this area?
- 5. Confirmed seismic monitoring and instrument placement for this shot?
- 6. Inspected the blast area for personnel or equipment working, broken down or other items that need to be addressed before loading?
- 7. Established blast site security and high wall safety zone by use of cones, markers, tape blasting signs or yellow blasting men?
- 8. Inspected the face for cracks, caves, overhangs or light burden area?
- 9. Inspected the blast site surface for cracks, slippery conditions and highwall hazards?
- 10. Checked for stray current, if applicable?
- 11. Placed stemming next to holes?
- 12. Checked actual layout versus diagram and measured burden and spacing at various points within the shot?
- 13. Held a tailgate meeting with the crew to assign duties and discuss the specifics of the shot?
- 14. Tape and check holes for proper depth, blockage and water?
- 15. Profile front row of holes for burden?
- 16. Calculated expected vibration at nearest non-company owned structure?
- 17. Expected Vibration IPS:
- 18. Structure or Seismograph:

EB-37 State of West Virginia Shot No. 1026  
Rev. 09/06 Department of Environmental Protection - Office of Explosives and Blasting

### BLASTING LOG General Information

**Permittee** ANDERSON COLUMBIA COMPANY JUNCTION CITY MINING **Permit No.** \_\_\_\_\_

**Operator Name** 19 **Date/Time** 10/26/09 2:00 pm  
*(Approved MR-19 Contract Operator, if applicable)*

**Company Conducting Blast** Dyno Nobel Inc.  
*(Contract blaster i.e.; shot service, if applicable)*

**Location of Blast** Grid Map N/A N 32 38 24.360' & W 84 30 43.2000 **Production** \_\_\_\_\_  
*(Specify grid designation from blasting grid map, GPS location if available, and type of shot.)*

**Nearest Protected Structure** Roper Residence **NAD 87** \_\_\_\_\_  
*(Specify name of homeowner/structure owner and structure number from blasting map)*

**Direction and Distance to Nearest Protected Structure** (Feet) 1,649 334°

**Nearest Other Structure** JUNCTION CITY MINING  
*(Specify name of owner, identifying no., describe i.e.; gas well, gas line, power line, water line, barn, etc.)*

**Direction and Distance to Nearest Other Structure** (Feet) 1,984 61°

**Weather Conditions** Clear 58 **Wind Direction and Speed** SW 6  
*(Include estimated temperature, precipitation, sky conditions, speed and direction wind is blowing from shot)*

**Type(s) of Materials Blasted** Granite

**Mats or Other Protection** N/A

### Blast Information

**Type(s) of Explosives: Blasting Agent** TITAN 1040 **Density** 1.25  
*(Include percent blend of emulsion to anfo) (Product density in g/cc)*

**High Explosives: (Boosters)** *(Include type, unit weight and number used)* SPARTAN 350G(0.75 lb) 60 EA

**Total Weight of Explosives: Blasting Agent** 5992.80 **lbs. + Boosters** 45.00 **lbs. =** 6037.80 **lbs.**

**Blast Hole Data: Number** 30 **Diameter** 4.000 **Depth** 40.00 **Burden** 10 **Spacing** 10  
*(For varying hole depth, diameter, stemming, burden and/or spacing, list additional data in 'Comments' and illustrate on 'sketch' on page 2)*

**Powder Column:** 28.00 - 30.0ft **Stemming: Type of Material** CLEAN CRUSHED STONE **Length** 10.00 - 12.0ft

**Delay Type, Brand and Delay Periods** DS DET 50FT 50', DS SURFACE 1000FT 1,000'

  
 Prepared for: JUNCTION CITY MINING  
 Shot: 1024  
 Location: 2nd Branch Sandblast  
 Date: Monday, October 24, 2009

# Data Organization

- **A well planned relational database is key**
  - ✓ **A good understanding of your available data and reporting requirements is critical**
  - ✓ **Plan for future growth**
  - ✓ **Ensure your IT infrastructure is correctly sized and maintained**
- **Information should be accessible to key users in your organization**
- **Central data storage provides many benefits...it also provides some of the biggest challenges**
  - ✓ **Make sure you have a plan to get all key information to a central location**

# Data Reporting

- **Online reporting provides a good way to allow people to run reports on demand no matter where they are**
- **You should be able to extract data in different formats for further manipulation and portability**
- **Dedicate the time to review the reports regularly and continually look for ways to improve how information is tracked and presented**

# Shot Design Tools

- **Allow a way to test different shot scenarios**
- **Look at potential problems before the shot is loaded**
- **When using electronic detonators you can tie the shot in on a computer and push the timing to the detonator through the blasting machine**
  - ✓ **Allows complex shots to be timed easily**
